

Pure Oxygen Cleaner Instructions

Soaking garments:

Dissolve in warm water. 1/4 cup for lightly soiled items, 1/2 cup for moderate soiling or to bleach yellowing whites and 1 cup for heavily stained garments. Soak in the tub for 1 hour or overnight. Hot water accelerates the bleaching action. In cold water, soak items for longer.

Washing machine:

Dissolve 2-3 tablespoons in water and add to washing machine with washing detergent or soapnuts.

General household cleaning:

1 cup Pure Oxygen Cleaner to 4 litres of water.

Cleaning wooden decks:

Dissolve 60 grams (1/4 cup) per litre of warm/hot water. Each litre will clean approximately 5 square metres of surface. Apply to surface, allow to work for 15-30 minutes, scrub with brush and rinse off.

IMPORTANT: Test a small spot on your deck first to ensure there are no adverse reactions with the paint/stain on your deck. Use a deck brush or stiff broom with either white or light coloured bristles.

Remove tea and coffee stains from cups:

Add 1 tsp and fill cup with hot water, leave for 15-30 minutes, then rinse well.

Sanitise home brew equipment and bottles:

Add one teaspoon (5 grams) of Oxygen Cleaner per litre of hot water.
